

REMARKS

The applicant has retained the signing attorney below to prosecute the present invention. Having carefully reviewed the content of the originally filed claims, the applicant believes that the originally filed claims do not represent what applicant believes to be the new and novel qualities of the present invention. As noted in the abstract and described in the original specification, the present invention is directed to a novel system for remotely adjusting an antenna, wherein the antenna alignment is measured and adjusted with respect to true vertical and/or true magnetic north. Applicant believes that the original Claims 1-26 do not clearly contemplate such adjustment, and therefore the original Claims 1-26 are herein canceled. New Claims 27 - 46 are added, which Claims 27-46 are clearly directed to a novel system for remotely adjusting an antenna, wherein the antenna alignment is measured and adjusted with respect to true vertical and/or true magnetic north. Applicant respectfully requests that the Examiner examine the new claims and advance the application toward allowance.

CONCLUSION

Original Claims 1 - 26 have been canceled and new Claims 27- 46 added. Applicant believes that new Claims 27- 46 are in condition for allowance and request that the Examiner examine Claims 27- 46 and advance the amended application to allowance. *The Examiner is cordially invited to telephone the undersigned for any reason which would advance the pending claims toward allowance.*

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'K L Green', with a long horizontal flourish extending to the right.

Kenneth L. Green
